○ Github ⌂ LeetCode ▮▮ Codeforces

PROFILE

I am not your typical candidate. I am an electrical engineer from Ethiopia with a deep passion for game development and software engineering. Overcoming challenges in an underprivileged environment, I have always been motivated by the pursuit of excellence in my field. I am dedicated to pushing the boundaries of software development through continuous learning and adopting emerging technologies, consistently striving for the highest standards of quality.

PROFESSIONAL EXPERIENCE

Software Engineering Intern   08/2023 – 10/2023
Yenetta Code 🔗   Addis Ababa, Ethiopia
- Created a website for Jami, a vital project, which led to the generation of ETB 3.5 million in revenue and played a pivotal role in the organization's expansion.
- Contributed to the development of a CV maker website and a Bible application using Express.js, Node.js, Dart, and Flutter.

Remote UG Head Of Education   09/2023 – present
Africa to Silicon Valley 🔗   Addis Ababa, Ethiopia
- Remote Undergrad is one of the programs Africa to Silicon Valley provides for students out of our current reach for in person training. I currently contribute to the program by organizing and giving lectures and team events.

EDUCATION

A2SV, Coding Academy 🔗   11/2022 – present
- A2SV is a non-profit organization based in the USA with amission to up-skill high-potential African university students, connects them with internship interviews at theworld's biggest tech companies.
- From 2021, A2SV has placed over 50 students at Google, LinkedIn, DataBricks, Palantir and so on.

Bachelor of Science in Electrical and Computer Engineering   07/2020 – present
Addis Ababa Institute of Technology 🔗   Addis Ababa, Ethiopia
- 13th best African global university. 🔗
- Cumulative Grade Point Average (CGPA): 3.70

PROJECTS

Instagram Clone (Flutter, Dart, Firebase) 🔗   present
Creating a complete Instagram replica using Flutter, Dart, and Firebase. Integrated user authentication, real-time data storage, and the capability to upload images.

Music Web Application Description 🔗
This project involves the use of HTML, CSS, React, MongoDB, and Express.js to develop a music web application.

SKILLS

- Advanced: Python, Dart, Flutter, CSS, HTML.
- Intermediate: React.js, MongoDB, Node.js, Express.js, TypeScript, Java, JavaScript.
- Very Familiar: Firebase, C++.

ACHIEVEMENTS

- I have successfully solved more than 800 problems on LeetCode and 300 on Codeforces. I am proud to rank in the top 0.5% of problem solvers on the LeetCode platform.
